Please Note: Even though a great deal of time is invested researching and keeping this menu up to date, never rely upon it as a sole resource for protecting a child with food allergies. Labeling laws do not require a manufacturer to disclose if a product is produced in a facility that also processes a known allergen. It is a voluntary statement. Always read the label before purchasing a product because a manufacturer may change their ingredients and processes at any time.

It is always up to the parent or guardian to consult with the manufacturer and make the final determination that a snack is safe for their child! Parents are welcome to provide an individual snack for their child with an allergy.
